

2006 Ultimate 20 North American Championship
June 22 – 25, 2006
Cascade Locks, Oregon
Sail Measurement & Boat Inspection Form

All boats must meet the current Ultimate 20 One-Design Class Rules. This inspection shall not prevent the challenge of any boat entered to prove that all of the other requirements of the U20 One-design Rules have been met. You or your representative must be present while your boat is inspected. Please present this form to the sail measurer and to your boat inspector. It will be collected after all items are complete.

Hull # _____ Sail # _____ Owner/Skipper _____

Hull Weight:

Weight: The dry weight of the boat shall not be less than 1,100 lbs. This weight shall include the keel, keel lifting crane assembly, bowsprit and its housing and retracting line, jib roller furling drum, traveler, rudder bracket, companionway hatch covers, and foredeck hatch assembly, if so equipped.

The total weight of the boat, ready to race, shall not be less than 1250 lbs., including the above, plus rudder and tiller assembly, mast, boom, all standing and running rigging, blocks and cleats, stanchions, and lifelines, sheet bags, compass and running lights. Excluding sails, dock lines, fenders, batteries, cushions, lifesaving equipment and other required equipment specified in Rules OD-VI and OD-VII.

Mast Rake: The total length of the head stay assembly must be such that the rake of the mast is between 34'-9" and 35'. As measured: _____

Sail Measurements: (Measurer's Initials required)

_____ Mainsail measured and passed.
